STANDARD BUILD COLLECTION

SHOPS

Built for work. Engineered to perform.

Changing the world of construction.

THE COLLECTION

The Shop Collection

Metal America's Standard Build shops are engineered for serious work. From 30-wide contractor bays to 60-wide industrial facilities, each design delivers clear-span floor space, commercial-grade framing, and the headroom to handle oversized equipment.

Every shop in this collection is built with 14-gauge steel framing, vertical roofing, and is rated for 140+ MPH winds. Larger models feature ladder legs and vertical siding for maximum structural integrity.
